Master of Science in Organizational Leadership Concentration in Entrepreneurship

WHY STUDY ENTREPRENEURSHIP?

To become a true strategic business/organization entrepreneur in a competitive global environment, one must have a diverse knowledge of leadership, operations, planning and marketing. A master's degree in Organizational Leadership (OL) with a concentration in entrepreneurship equips our students to be successful strategic entrepreneurs in either business or a nonprofit organization.

ABOUT THE PROGRAM

The Master of Science degree in Organizational Leadership with a concentration in entrepreneurship is a 33-credit program that provides a professional level of knowledge in entrepreneurship by preparing students for success in any organization that embodies an entrepreneurial style of leadership as their business philosophy. The program also provides students with fundamentals, knowledge and experience to help them to start their own business or to advance in the field of entrepreneurship.

Designed to meet the needs and schedules of working students, the program can be completed in two years. Courses are offered in the evenings to accommodate the working professional.

Mercyhurst also offers a 12-credit graduate certificate in entrepreneurship. The goal of the certificate is to prepare students to be successful professionals in the dynamic field of business.

OL VS. MBA?

While the MBA emphasizes management and administrative functions within an organization (the primary focus being on order and consistency), Mercyhurst's Organizational Leadership Master of Science degree emphasizes professional leadership, while concentrating on vision and empowerment.

PROGRAM PHILOSOPHY

The OL program challenges students to synthesize contemporary scholarship with insight from our service-oriented, ethically based heritage. The purpose of the organizational leadership graduate program is to inspire our students to become exemplary leaders in service to others.
