OUR MISSION

In accord with the University Mission Statement and grounded in the Art Department's history and tradition, we aim to provide training for students in selected artistic areas so that they have the opportunity to develop and refine their talents and abilities. With the purpose in mind, Art faculty members with their varied areas of expertise, encourage and emphasize the student's pursuit of excellence. We believe in a comprehensive approach to teaching that values a range of artistic processes and products, as well as a variety of historical and contemporary methods to the study of art. We believe that art is a universally accepted form of sharing, capable of promoting lifelong, caring learners. Dedicated to developing students who are globally and socially aware and engaged in service and leadership, we provide a wide range of opportunities for students to encounter art. Beginning with Foundation Year, course work emphasizes a hands-on studio approach. The learning of artistic processes, methods of creative problem solving, the diversity of art materials, media and approaches, the importance of design, and the role of art history are mastered and integrated to help form future ambassador artists, teachers, therapists, designers, and practitioners.
