

Assistant Professor of Intelligence Studies: Fall 2019
Ridge College of Intelligence Studies and Applied Sciences

Job Description

Mercyhurst University in Erie, PA, invites applications for the position of **Assistant/Associate Professor of Intelligence Studies** in the Department of Intelligence Studies of the Ridge College of Intelligence Studies and Applied Sciences. The position is at the Erie campus and begins fall semester 2019. To be hired at the tenure-track assistant professor level, applicants should possess a Ph.D., or other terminal degree. ABDs are encouraged to apply, but hiring will be at the visiting instructor level without a tenure-track option until Ph.D. is completed. Candidates should have five years of **IC experience**. Special attention will be given to applicants who have **ten or more years** of practitioner experience and the ability to manage applied analytic projects.

Job Summary

Successful candidates will teach introductory and applied courses in intelligence analysis at the undergraduate and graduate levels, in addition to the ability to teach undergraduate or graduate courses in at two one or more of the following areas:

- Leadership in Intelligence
- Structured Analytic Techniques
- Intelligence Theory and Practice
- Advanced Analytic Techniques
- Intelligence Writing And Presentation
- Strategic Intelligence
- Intelligence Collection and Analysis

In addition to instruction, duties will include curriculum development, service to the profession, and participation in University and Ridge College activities, including student mentoring, development of internship and employment opportunities, and grant or contractual work with the Ridge College's Institute. The selected candidate must demonstrate a commitment to teaching excellence, continued learning in their field, academic scholarship, and public scholarship.

The Ridge College of Intelligence Studies and Applied Sciences is an interdisciplinary school that brings together the skill set of the intelligence professional, the math and computer systems expert, and the communications specialist and produces career professional comfortable in all three domains. The college meets these objectives through a challenging curriculum that emphasizes information collection, quantitative and qualitative analysis, and the application of technology to assist in information management, and knowledge transfer (big data). The importance of multi-media, social media and data visualization as communication platforms is

emphasized. Courses in leadership, ethics and organizational theory will assist in preparing students for new leadership and management roles in intelligence and applied sciences.
